

Table 1: interaction model statistics for a hypothetical population by time period

seasonal period	positive SNH effect plausibility (percent)	population exposed to the traps (example)	SNH mean trapped spiders (percent)	control mean trapped spiders (percent)
weeks 23-25	3.1	136	30.0	37.6
weeks 26-31	46.8	41	28.6	29.1
weeks 31-34	77.8	17	34.0	26.0
